Skills

- HTML, CSS, JavaScript, TypeScript, React, React Hooks, Next.js, Vite.js, Tailwind, ESLint, Prettier, Husky; Blazor; Angular;
- C#/.NET; Node.js, Express, Jest, Swagger, CI/CD, Github Actions, Docker, Java, Spring Boot (Spring Data JPA, Spring Security), API REST, POO;
- PostgreSQL, MongoDB, Prisma ORM; Entity Framework Core; SQL Server; Azure DevOps;

Professional Experience

- | | | |
|---|----------------------|-------------------------------------|
| Full Stack Developer Intern | Boneside | 06/2025 - Present |
| <ul style="list-style-type: none">• Currently working on backend development using the .NET ecosystem, including ASP.NET Core, Entity Framework Core, and SQL Server. On the frontend, I use Blazor and Angular with TypeScript. For version control and task management, I work with Git and Azure DevOps. | | |
| Full Stack Developer (Freelancer) | Self-employed | 06/2025 - Present |
| <ul style="list-style-type: none">• Building web applications and systems for clients seeking custom solutions. Technologies used include Next.js, Vite, Prisma ORM, TypeScript/JavaScript, PostgreSQL, Node.js, and Express. | | |
| IT Intern | CET Santos | Santos, SP 09/2024 – 06/2025 |
| <ul style="list-style-type: none">• Automated spreadsheets (Google Sheets) using App Script (JavaScript-based platform);• Volunteered to develop a web system to replace excessive use of spreadsheets, addressing a key issue identified by my supervisors. I proposed and built the solution using Next.js, TypeScript, Prisma ORM, and PostgreSQL. The project was well received, with expectations of improving employee productivity by up to 25% and saving time compared to manual data entry across over 10 spreadsheets. The system has been forwarded to the IT department and is currently under review for implementation. | | |

Projects

- | | | |
|--|------------------------|--|
| Finance APP API | GitHub | São Paulo, Brazil 05/2025 - 05/2025 |
| <ul style="list-style-type: none">• This is a RESTful API developed for managing personal finances, named finance-app-api. It supports full CRUD operations for users and financial transactions, along with endpoints to query user balances. The project structure follows a modular architecture, using factories for controller creation to enhance code organization and testability.• Core technologies include Node.js (runtime), Express.js (server and routing), and Prisma ORM (PostgreSQL database interaction). To ensure code quality, the project uses ESLint, Prettier, and Jest for automated testing, along with Husky and lint-staged for pre-commit checks. Other notable dependencies are bcrypt (password hashing), uuid (unique ID generation), and zod (data validation).• The project is still in development. A React-based frontend is planned to visualize the data, making it a complete Full Stack application. | | |

Formação e Cursos

- | | | |
|--|-------------------|-------------------------------------|
| Santa Cecília University | University | Santos, SP 06/2023 – 06/2025 |
| <ul style="list-style-type: none">• Undergraduate Degree – Technology in Systems Analysis and Development (Distance Learning) | | |
| English (Volunteer Program) | Language | Santos, SP 02/2020 – 07/2020 |
| <ul style="list-style-type: none">• Intermediate Level• Note: The classes were conducted by a native speaker from Haiti, who had previously worked as a UN interpreter. I did not receive a certificate as it was a volunteer initiative. I was transitioning to the advanced level when the program was discontinued by the institution. | | |

Others

- **Knowledge Sharing:** I genuinely enjoy sharing newly acquired knowledge with others. I believe that learning is more impactful when it's shared, and I strive to explain concepts in an accessible way, even to those unfamiliar with the subject.
- **Hobbies:** I enjoy playing video games, occasionally reading educational books, spending time at the beach with friends, and relaxing with games during my free time.
